# BUMP STOP™

## Advanced Cylinder Technology

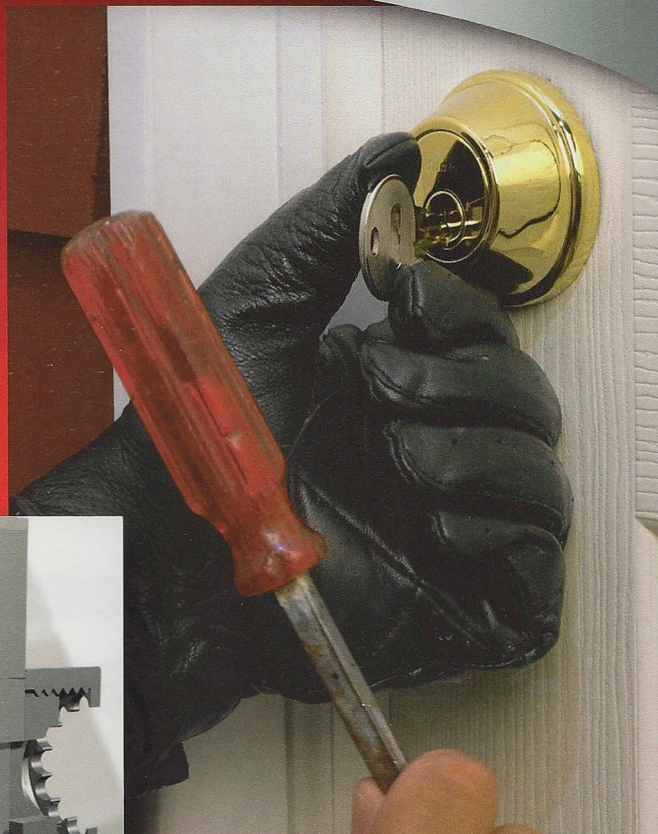

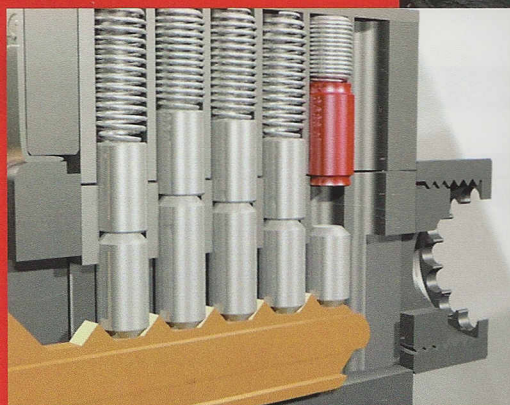

Lock bumping – a surprisingly simple method of breaking in through locked doors and padlocks – is undoubtedly the newest emerging threat to personal property security. And virtually all locks in use today are particularly vulnerable to bumping. Until now.

### THE BUMP STOPS HERE!

As the world leader in security hardware, Master Lock has stepped forward to create a revolutionary new lock cylinder that is virtually bump proof and capable of detecting bump attempts.

BumpStop™ Advanced Cylinder Technology employs an innovative patent pending top pin design which has been specially engineered to resist bumping attacks. Unlike standard pins, it does not react to impact from a bump key and bump tool.

## BumpStop now comes standard in all NightWatch Deadbolts.

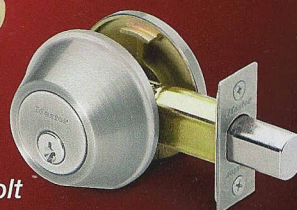

**The only deadbolt to lock out intruders...  
...even if they have the key.**

- Meets ANSI Grade 2 requirements.
- Available in a standard deadbolt design and in the industry's first ever, dial combination deadbolt in Polished Brass, Antique Brass and Satin Nickel.

*Lock it like a standard deadbolt, then pull out the lever to activate the NightWatch feature and lock out all keys.*

*NightWatch Combination  
Deadbolt*
